

Three Simple Steps to a Better Smile

1 Tell us how you define a beautiful smile

Are you unhappy with the appearance of your mouth and teeth? Do you have specific complaints? A more beautiful smile begins with your needs and goals.

2 Your smile analysis

We'll take a series of photographs and impressions. Using computer imaging and stone models, we'll analyze a number of criteria, including:

- the color of your teeth
- your lip position and support
- the alignment and angle of your teeth
- the dimensions and length of your teeth
- the symmetry of your gum line

3 Your treatment plan

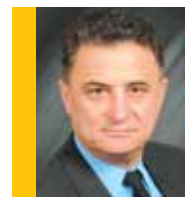

Based on the goals you've defined and the results of your smile analysis, our dentists and lab technicians will recommend your customized treatment plan, which may include one or more options.

Smile BeautificationSM Services

Making stained teeth sparkle

Our ZOOM! treatment whitens your teeth permanently. This 2-hour process is the most effective whitening technology available. Performed in our office by our ZOOM! Whitening Technicians.

Realigning, reshaping and matching teeth

Veneers and bonding actually change the shape, alignment and color of your teeth. Natural looking veneers are considered the ideal treatment, but bonding is a more conservative and cost effective option for some patients. Crowns may be recommended when the teeth are not strong enough for veneers or bonding. Performed in our offices by our Restorative Specialists and Dental Technicians.

Crowding control

If severely crowded teeth are marring your smile, we will refer you to one of a number of excellent orthodontists in the area.

Fixing unattractive gum lines

If your gum line is a problem, cosmetic gum surgery may be the answer. We will refer you to a periodontist, or gum specialist.

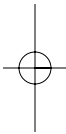

before

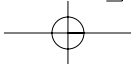

We're committed

You won't find a more caring Smile Beautification Team. Our office staff will make your scheduling appointments a breeze. Our dental professionals will ease any anxiety you might have. We use the most effective technologies to ensure that your smile is enhanced and your experience is positive.
